TRU SEAL

Magnum Systems' Model TRU Seal ultrasonic valve bag sealer. The TRU Seal has been specifically designed to work with Magnum valve bagging equipment and incorporates the latest ultrasonic sealing technology.

SEAL VALVE BAGS WITH INNOVATIVE ULTRASONIC TECHNOLOGY

- Ultrasonic waves alter molecular structure of sealing agent without heat, which reduces product degradation
- Rigid mount setup at filling source decreases amount of bag movement while maintaining bag shape
- Ultrasonic waves displaces product from seal area providing a clean, positive seal
- Helps prevent product loss during shipping
- Capable of both plastic and paper valve sealable bags
- Works well with dusty, fluid, powder, and hydroscopic products
- Can be used with any of Magnum Systems valve bag fillers

One Partner For All Your Material Handling Needs.

ULTRASONIC VALVE BAG SEALER
